U-F202-32	USSD - FC 2Gb/s, 2 Ports	32	\$31,000
U-F402-08	USSD - FC 4Gb/s, 2 Ports	08	\$14,000
U-F402-16	USSD - FC 4Gb/s, 2 Ports	16	\$20,000
U-F402-32	USSD - FC 4Gb/s, 2 Ports	32	\$32,000

- Pricing, specifications, availability, terms and conditions are subject to change without notice
- The prices shown do not include any taxes, import or export duties, tariffs, custom charges or insurance
- Payment terms are payment in advance unless otherwise agreed in writing. All shipments will be made factory F.O.B.

New Model USSD 200

Our latest product generation – the USSD 200 – has a 2U rack mount form factor, a maximum storage capacity of 32 GB, and supports up to 320,000 IOPS. The capacity can be scaled up by daisy chaining USSD devices in 19" rack cabinets. USSD supports virtually all connectivity options on the market including 320 MB/s SCSI-3 Ultra-Wide LVD, 3 Gb/s SAS and 4 Gb/s Fibre Channel interfaces. Connectivity can be rapidly modified and adapted to your data center's evolving requirements. USSD supports resource leveraging where multiple host computers share USSD capacity. It is an ideal resource in switched fabric environments (SAN) for processing frequently accessed data.

USSD is a plug-and-play device that appears as a conventional SCSI or Fibre Channel disk drive to the host computer's operating system and supports all major operating systems. The new USSD 200 includes expanded USSD management utilities. Reliability is assured by USSD's sole use of standard industry components of proven performance and reliability and its assembly by a world-class, ISO 9001:2000 certified manufacturer-integrator. Features include: hot swappable redundant power supply (2 Power Input Sources); redundant fans; up to 4 hot swappable data retention HDDs; Error Detection/Correction (64 bytes dedicated per 512 bytes sector). USSD is covered by a three year warranty.
